MEMORANDUM FOR: AFIGO-S
Headquarters USAF

ATTENTION : Colonel Leo P. Geary

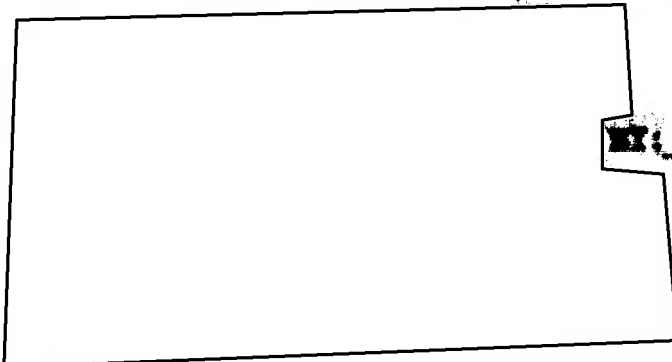

SUBJECT : Prepositioned Mil Spec Fuel

1. It is requested that 100 drums of Mil Spec 25524B or LF-1B fuel be prepositioned [redacted] in the event that we have to deploy to that base. Inasmuch as this fuel may be used for pre-strike as well as post-strike missions, it will be necessary to establish fuel sampling procedures on a monthly basis to insure fuel is fully qualified for overflights. Request we be advised of the results of these monthly tests. It is equally important that the quality of the fuel be protected to the maximum by providing storage in a secure area.

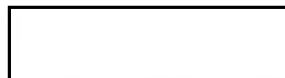

2. Fuel may be obtained from tested stocks at Detachment H. We will instruct the Detachment to confine the shipment to one fuel batch, if possible, to minimize test sample submissions. [redacted] Request we be advised of ETA of airlift so that necessary coordination may be effected with the Detachment.

3. Please advise us when the fuel is in position at [redacted] and the individual to be contacted when the necessity arises to use the fuel.

FOR THE DEPUTY DIRECTOR (SCIENCE AND TECHNOLOGY)
